# Hassan Momin

FULL STACK DEVELOPER

---

Hassan has an innate passion for technology since his early years. It was inevitable for him to delve into the dynamic realm of software development. Initiating his journey by teaching himself HTML/CSS and JavaScript, he ventured into freelancing, crafting websites for friends and family. Subsequently, he honed his skills through a comprehensive full-stack coding bootcamp, equipping him with the necessary tools to thrive in a professional work environment.

As a developer, he thrives on problem-solving, navigating the ever-shifting landscape of client needs and technology evolution. Each day, he brings his A-game to meet client requirements and sculpt visually stunning websites that drive traffic and elevate our clients' businesses.

His technological expertise spans a diverse array, encompassing Java, Python, SQL, Bootstrap, WordPress, and more. In the fast-paced world of software development, he stays on the cutting edge to ensure our projects are not only functional but also aesthetically compelling.

Beyond the office, you might find him absorbing knowledge from documentaries, feeding his insatiable curiosity, or pushing himself at the gym, dedicated to continual self-improvement—striving to be 1% better every day.

Hassan is currently working towards his bachelors in MIS. Hassan holds two AWS certifications in Cloud Practitioner and Solutions Architect and graduated Tech Elevator's bootcamp.
